A.D. 1881, 4th APRIL. N° 1468.

Wheat
Prove
Material for Flavouring and Colouring Beer.

(This Invention received Provisional Protection only.)

PROVISIONAL SPECIFICATION left by Arthur Bayley Worthington at the Office of the Commissioners of Patents on the 4th April 1881.

ARTHUR BAYLEY WORTHINGTON, of Beccles, in the County of Suffolk, Brewer.
"AN IMPROVED MATERIAL FOR FLAVOURING AND COLOURING BEER."

5 The Invention has for its object the preparation of an improved material for flavouring and colouring beer, to be used in lieu of the malt or sugar hitherto employed for such purposes.

For this purpose I take barley, either malted or unmalted, and add thereto a solution of saccharine during the roasting process. By the employment of my improved material in brewing, a finer flavour and more brilliant and sparkling colour are imparted to the beer.
